Analysis of Additional Mint Facilities ; Distribution of Coins 1963

UNITED STATES GOVERNMENT

Memorandum

TO : Mr. Marshall M. Reddish
Assistant Superintendent

DATE: April 19, 1963

FROM : A. L. Philippus
Head, Cash and Deposits Division

SUBJECT: Analysis of Additional Mint Facilities "Distribution
of Coins" -- Bureau of the Mint

Agreeable to your request I have made an analysis of the contents of pages 33 through 38 of the above subject matter and present the following comments:

The data contained in the tables therein shown, quite definitely confirm my previous memorandums to you as to shipping costs on coin shipments from Denver and Philadelphia. It is not clear just what the mileage chart, Table I on page 34, is supposed to prove. It would seem to me that distance from Philadelphia or Denver in miles does not enter into a comparison of transportation costs so far as expenses to the Bureau are concerned. If a rate from one point is cheaper than from another point to the same destination, it is difficult to understand what bearing the mileage has on the subject. The same reasoning would apply to Table II. Both of these tables are interesting but apparently of very limited value.

As to Table III, page 35, this is rather a substantiation of previous memorandums given to you to prove the lower transportation costs from the Denver Mint to 22 banks. A breakdown of this table discloses the following statistics:

The following nine banks show rates from Denver cheaper than from Philadelphia:

Chicago
Dallas
Houston
Kansas City
Los Angeles
Memphis
Minneapolis
St. Louis
San Francisco

One bank, Louisville, shows rates from Denver and Philadelphia as being equal. Thirteen banks show no rates from Philadelphia. One of these is Denver on which any Philadelphia

of Coins" -- Bureau of the Mint

Page 2

rate would be 100% higher than from Denver since the Denver Federal Reserve Bank now pays transportation charges on coin from the Denver Mint to their bank.

The rate information furnished by Navajo Freight Lines shows a rate from Denver cheaper than from Philadelphia to Nashville, i.e. Denver -- \$2.28, Philadelphia -- \$3.23.

The other eleven banks for which no Philadelphia rates are shown are :

El Paso
Helena
Little Rock
*New Orleans
Oklahoma City
Omaha
Portland
Salt Lake City
San Antonio
Seattle
(Philadelphia)

With the possible exception of New Orleans, it stands to reason that the other 10 banks would be cheaper from Denver than from Philadelphia, and it is undoubtedly for that reason that no rates are shown from Philadelphia. Therefore, summarizing, the following 22 points are hereby listed as having rates lower from Denver than from Philadelphia out of 37 destinations:

Oklahoma City
Omaha
Portland
St. Louis
Salt Lake City
San Antonio
San Francisco
Seattle

A statement in paragraph 1 at the top of page 36 as to the likelihood of obtaining lower transportation rates on the basis of larger volume would apply equally to Denver if a larger volume of coins were produced. Carriers have questioned us on several occasions as to the yearly volume which might be shipped to certain banks to determine whether a rate to a certain point would be profitable to their lines and their connecting lines. Therefore, a larger volume of coins shipped would very likely lower the rate from Denver if such as increase in coin shipments were possible.

The second paragraph on the same page (36) indicates that had the production at Philadelphia been available, it would still have been the most economical program to ship one-half of the loads in 1962 from the Denver Mint.

The third paragraph at the top of page 38 is, of course, self-explanatory and needs no comments. It should be clear to anyone that the rate on silver coins shipped from Philadelphia to New York would be tremendously lower than from Denver to New York. The same logic applies to the four destinations listed.

Region 3 will utilize to obtain receipt of delivery of check to Treasury.

6

After receipt of payment (cash) by Treasury, Treasury will acknowledge payment and mail to control of delivery point -- probably U. S. Assay Office in New York or in San Francisco, or the U. S. Mint in Denver. Upon acknowledging receipt of delivery by the purchaser, this copy should return to us to inform us of delivery and we can close the file with its receipt.

7

After receipt of payment (cash) by Treasury, Treasury will acknowledge payment and mail to purchaser, who must in turn present it to the delivery point to release the delivery. Purchaser retains number 7 for his record.

8

To be delivered by Metals Branch to Bureau of the Mint for its internal use.
